AP10/15ES	RECYCLED

L. 615mm W. 405mm H. 190mm

PALLET QTY	WEIGHT
40 units	6050 gms

ENVIRO-SKATES

introducing the new enviro-skates range;

AP7ES: Purposely built to fit our industry standard No. 7 crate (32 litre).

AP10/15ES: Tailor made to fit our industry standard No. 10 and 15 crates (52 litre and 68 litre).

AP68ES: Completes the range with a perfect fit for our AP68 Security Crate (see page 15).

Made from foam filled recycled PP but with a load rating of 600kgs means the Enviro-Skates range is very heavy duty and made to last even under constant use. However the Enviro-Skates are still much lighter than the steel dollies on the market. More importantly it is a much more economical option to anything else available but quality is certainly not sacrificed.

Another handy feature is the Enviro-Skates ability to stack for easy storage when not in use. The skate's castors are the key having zinc plated steel fasteners with "nyloc nuts" giving them a long life. These casters also make the skate easy to manoeuvre and with the Enviro-Skates rounded corners on the frame it will always minimize any bump damage. The Enviro-Skates have a brake included making it the perfect partner for the crates for a multitude of applications.

Ask about our stainless steel castor version (no bearings) in the Enviro-Skates range made specifically for the fishing industry.
