

SKATE HANDLE

Product Overview

Stainless steel Skate Handles are designed to make it comfortable for the user to move heavy crates effortlessly without having to bend, reducing strain on the user and increasing productivity.

The benefits of using the OKKA products Skate Handle include:

- Sturdy stainless steel handle with rubber grips for comfort and stability.
- One size fits all handle designed to make it comfortable for the user regardless of their height.
- The ability to fit the Skate Handle standing up with no bending required, making it ideal for manual handling or to avoid any work place injuries associated with the back or knees.
- Dramatically eases pushing/guiding a loaded skate around
- Move up to 600kg crates or security crates from one location to another easily and efficiently.
- Compatible with both APOES & APOskateSSBlue.

Skate Handle: SkateHandleSSSteel
Technical Specifications
